

FOR IMMEDIATE RELEASE:

**Award Winning Web Tool Helps Plan Your Next Project and Protect Airports**

**Can I build a (*fill in the blank*) here?**

Columbia, SC – October 9, 2014 - The South Carolina Aeronautics Commission (SCAC) has made available the Compatible Land Use Evaluation (CLUE) tool to the general public and local permitting authorities. The website based tool features a trial area where anyone may evaluate construction locations as to the compatibility with South Carolina state aeronautical laws (Title 55) governing development in the vicinity of a South Carolina airport. The CLUE tool is a great planning tool to evaluate all types of proposed construction projects. The tool was designed to assist developers and local permitting authorities in complying with Title 55 requirements. SCAC was awarded the “Most Innovative State Program” award this past September for their development of the CLUE tool by the National Association of State Aviation Officials (NASAO). To try the tool, point your browser to:
